

REPORT TO THE TRUST BOARD - PUBLIC
11 JULY 2018

Title	National Staff Survey 2017 results
Author	Mason Fitzgerald, Director of Planning and Performance
Accountable Executive Directors	Mason Fitzgerald, Director of Planning and Performance Dr Amar Shah, Chief Quality Officer Tanya Carter, Interim Director of Human Resources

Purpose of the Report:

To report a summary of the Trust's results in the National Staff Survey 2017, and outline the Trust's approach to improvement. The Board are asked to reflect on its role in contributing the workstreams that address the findings of the survey.

Summary of Key Issues:

- The national results of the 2017 staff survey were disappointing, with 21/32 key findings deteriorating from the previous year
- The Trust experienced a deterioration in the overall staff engagement score, and in a number of other indicators
- The findings have been fed into discussions regarding the staff experience outcome of the Trust strategy, as well directorate level plans.
- The report sets out the Trust's approach to improvement, which links to the new Trust strategy
- The summary staff survey report is attached

Strategic priorities this paper supports (Please check box including brief statement)

Improved patient experience	<input checked="" type="checkbox"/>	There is a strong evidence base that engaged staff provide better patient care and outcomes.
Improved health of the communities we serve	<input type="checkbox"/>	
Improved staff experience	<input checked="" type="checkbox"/>	The approach to improvement set out in this paper are designed to directly improve staff experience
Improved value for money	<input checked="" type="checkbox"/>	There is a strong evidence base that engaged staff and more health and productive at work, and therefore contribute to value for money

Committees/Meetings where this item has been considered:

Date	Committee/Meeting
Various	Versions of this report have been presented to various internal Trust meetings, and has been reported to the Council of Governors on 17 May.

Implications:

Equality Analysis	The Trust's action plan is designed to improve equality through the reduction in variation between different staff groups. .
Risk and Assurance	If staff are not engaged at work, there is a clear risk that patient care will be adversely affected.
Service User/Carer/Staff	As above, the work in this area is designed to improve staff experience. Evidence shows a clear link between staff experience and patient care.
Financial	Evidence shows that high staff engagement is strongly correlated with low sickness absence levels, which has a financial benefit to the Trust.
Quality	Evidence shows a clear link between staff satisfaction and patient care.

1.0 Background

- 1.1 The National Staff Survey has been carried out since 2002. It seeks to measure staff experience in the NHS, in order to provide comparative analysis with other NHS Trusts, and opportunities for improvement.
- 1.2 The 2017 survey was conducted in October-November 2017. The results were published on 6 March 2017. The report is attached.
- 1.3 The Trust's response rate was 50%, an increase of 5% from the previous year (and a 15% increase over the last two years).
- 1.4 The profile of respondents is different than 2016, with the addition of Tower Hamlets Community services, and the loss of Newham health visiting and child information services.

2.0 National and local context

- 2.1 The national results of the 2017 national staff survey were disappointing, with 21/32 key findings deteriorating from the previous year. The national scores over time for mental health/community trusts are set out below:

2013 3.72
2014 3.71
2015 3.79
2016 3.80
2017 3.78

- 2.2 The overall staff engagement scores for the London mental health/community trusts are as follows:

Trust:	Overall engagement score:
Tavistock	4.01
ELFT	3.90
Oxleas	3.84
NELFT	3.82
WLMHT	3.82
BEHMHT	3.81
SLAM	3.80
CANDI	3.79
CNWL	3.78
SWLSTG	3.71

3.0 2017 results

- 3.1 The Trust's results for 2017 can be summarised as follows.
- 3.2 The Trust's score for the overall staff engagement indicator was 3.90 (with 5 being the maximum score), which places it 5th across mental health and mental health/community trusts (out of 55 Trusts). The Trust's score decreased from 3.95 in 2016.

3.3 The main directorates with lower scores than 2016 were Luton, Bedfordshire, and Forensic services. Across the Trust, there were deteriorating scores in relation to resourcing and support, health and wellbeing, reporting unsafe clinical practice and agreeing that their role makes a difference to patients. These scores provide a warning sign that staff experience is a significant risk for the Trust.

3.4 The Trust's ranking over the least five years is therefore as follows:

Year:	National ranking:
2013	4 th
2014	1 st =
2015	4 th =
2016	1 st
2017	5 th

3.5 The Trust's progress over time is set out below:

3.6 The Trust has four scores that were the best in the country for mental health/community health providers, i.e.:

- Percentage of staff reporting errors, near misses or incidents witnessed in the last month
- Quality of non-mandatory training, learning or development
- Percentage of staff able to contribute towards improvements at work
- Staff satisfaction with the quality of work and care they are able to deliver

- 3.7 In contrast there continue to be areas where the Trust does less well compared to the national average, including levels of violence and aggression experienced by staff, and concerns about career progression and discrimination. The Trust's scores in this area are similar to other London mental health/community trusts, but this is not an acceptable benchmark as the scores themselves are of concern.
- 3.8 Additional questions were included in the survey so that staff were able to submit a narrative response to these questions. The results have been analysed for Trust-wide themes. The themes are:
- There were more responses about working hours and career progression, which probably reflect the fact that these issues affect all staff
 - There is a high increase in the number of staff who feel that the Trust has good systems in place to reduce levels of physical violence from patients, and bullying/harassment from staff
 - There is a stronger message around workloads being too high, challenging targets and resources being inadequate
 - There was strong support for the Trust's approach to learning and development, but balanced by views about the need for greater transparency and subjectivity about the opportunities available
- 3.9 The results have been distributed in the Trust, and are being discussed at Directorate Management Teams, professional groups, staff equalities networks and other relevant forums.
- 3.10 The Joint Staff Committee away day held on 14 March focused on staff wellbeing, and a refreshed action plan is being developed following this event. The Freedom to Speak Up conference on 27 June focused on supporting staff to speak up, and effective resolution of concerns.

4.0 Equality

- 4.1 The report includes the results of the Workforce Race Equality Standards indicators that are measured through the staff survey. These are set out below:

			Your Trust in 2017	Average (median) for combined MH/LD and community trusts	Your Trust in 2016
KF25	Percentage of staff experiencing harassment, bullying or abuse from patients, relatives or the public in last 12 months	White	29%	25%	30%
		BME	33%	28%	36%
KF26	Percentage of staff experiencing harassment, bullying or abuse from staff in last 12 months	White	23%	20%	21%
		BME	23%	23%	25%
KF21	Percentage of staff believing that the organisation provides equal opportunities for career progression or promotion	White	84%	88%	86%
		BME	73%	76%	70%
Q17b	In the 12 last months have you personally experienced discrimination at work from manager/team leader or other colleagues?	White	9%	6%	8%
		BME	13%	11%	14%

4.2 The results show that:

- Bullying and harassment from patients has decreased by 3% for BME staff, and the gap between white and BME staff has reduced from 6% to 4%
- Bullying and harassment from staff has decreased by 2% for BME staff and there is now no difference between white and BME staff
- Fairness of career progression has improved by 3% for BME staff and the difference between white and BME staff has reduced from 16% and 11%
- Discrimination at work has reduced by 1% for BME staff and the difference between white and BME staff has reduced from 6% to 4%

4.3 There is also progress in other areas. For example, there has been a 16% increase over the last two years in the number of disabled staff reporting that reasonable adjustments were made, and a reduction in the number of staff reporting discrimination on the grounds of disability.

4.4 All of the staff networks (BAME, LGBTQ, Women and Disabled staff) have been considering the results in order to inform their workplans for the year.

5.0 Council of Governors input

5.1 The Council of Governors received a paper and a presentation regarding the results at their meeting on 17 May 2018. The Council broke into groups and fed back key issues for action as follows:

- Improve staff morale by more regular meetings between staff and senior management
- Staff management and resilience training for middle management
- Change management training
- Better corporate support and more emphasis on anti-bullying policies
- Better supervision arrangements
- Identify the factors that are conducive to good staff experience and focus on them (i.e. leadership development)

6.0 The Trust's approach to improvement

- 6.1 Improved staff experience is one of the four strategic outcomes in the Trust's new strategy, and work will therefore be planned and delivered as part of the strategic planning framework and the aligned workforce strategy. The workforce strategy has four drivers which explicitly link to staff experience (capacity & capability, leadership, team working and enjoying work).
- 6.2 The annual priorities for 2018/19 that explicitly address the staff survey results are in relation to development of the Trust's leadership programme, delivery of a staff wellbeing plan, and delivery of the workforce equalities plan.
- 6.3 At Trust level there is also a focus on improved listening and learning from staff feedback, with the further utilisation of the staff networks, Freedom to Speak Up Guardian, and staff governors. This will be drawn together at a Staff Council, chaired by the Chief Executive, which will oversee the workplan arising from the various forums.
- 6.4 At directorate level action planning based on local results has taken place. There is a focus on having time for reflective practice and team working, improved engagement with senior management, and addressing bullying and harassment.
- 6.5 At team level, three of the 5 teams in the Enjoying Work programme have now shown a positive shift in staff experience. The programme is currently being rolled out to 21 teams across the Trust. The programme was launched on 28 June.
- 6.6 The teams involved in the Enjoying Work programme collect data on a daily basis, through a mobile application co-developed by the Trust and a technology firm. Teams also collect other information in order to monitor progress. The Trust will also be introducing a quarterly Pulse survey.
- 6.7 In advance of the 2018 survey, which commences in October, a communications plan is in place in order to feedback changes and improvements made since the last survey.
- 6.8 Progress in this area will be monitored at the Workforce Committee, which is now chaired by the CEO. Board level scrutiny is provided by the Appointments & Remuneration Committee.
- 6.9 In terms of overall assurance, therefore, the following is in place:
 - 6.9.1 Executive leads in place
 - 6.9.2 Strategic objective as part of the Trust strategy
 - 6.9.3 Workforce Committee providing executive oversight, chaired by the CEO
 - 6.9.4 Appointments & Remuneration committee providing board oversight
 - 6.9.5 Progress reported as part of the Integrated Quality & Performance report

- 6.10 All Board members are involved in the work in various ways, i.e. through executive and Non-Executive visits to services. The Board are also requested to contribute to the action plan by engaging in specific workstreams, as follows:

Workstream:	Board input:
Equalities	Chief Nursing Officer Director of Human Resources Trust Chair
Staff concerns/freedom to speak up	Chief Executive Chief Nursing Officer Senior Independent Director
Leadership development	Director of Planning and Performance Chief Quality Officer Director of Human Resources NED workforce lead
Enjoying Work QI programme	Chief Quality Officer Director of Planning and Performance NED workforce lead

7.0 Action being requested

7.1 The Trust Board is asked to:

- **RECEIVE** and **DISCUSS** the report
- **CONSIDER** areas where the Board can contribute to the work required

2017 National NHS staff survey

1. Introduction to this report

This report presents the findings of the 2017 national NHS staff survey conducted in East London NHS Foundation Trust.

In section 2 of this report, we present an overall indicator of staff engagement. Full details of how this indicator was created can be found in the document ***Making sense of your staff survey data***, which can be downloaded from www.nhsstaffsurveys.com.

In sections 3, 4, 6 and 7 of this report, the findings of the questionnaire have been summarised and presented in the form of 32 Key Findings.

In section 5 of this report, the data required for the Workforce Race Equality Standard (WRES) is presented.

These sections of the report have been structured thematically so that Key Findings are grouped appropriately. There are nine themes within this report:

- Appraisals & support for development
- Equality & diversity
- Errors & incidents
- Health and wellbeing
- Working patterns
- Job satisfaction
- Managers
- Patient care & experience
- Violence, harassment & bullying

Please note, two Key Findings have had their calculation changed and there have been minor changes to the benchmarking groups for social enterprises since last year. For more detail on these changes, please see the ***Making sense of your staff survey data*** document.

As in previous years, there are two types of Key Finding:

- percentage scores, i.e. percentage of staff giving a particular response to one, or a series of, survey questions
- scale summary scores, calculated by converting staff responses to particular questions into scores. For each of these scale summary scores, the minimum score is always 1 and the maximum score is 5

Responses to the individual survey questions can be found in Appendix 3 of this report, along with details of which survey questions were used to calculate the Key Findings.

Your Organisation

The scores presented below are un-weighted question level scores for questions Q21a, Q21b, Q21c and Q21d and the un-weighted score for Key Finding 1. The percentages for Q21a – Q21d are created by combining the responses for those who “Agree” and “Strongly Agree” compared to the total number of staff that responded to the question.

Q21a, Q21c and Q21d feed into Key Finding 1 “Staff recommendation of the organisation as a place to work or receive treatment”.

		Your Trust in 2017	Average (median) for combined MH/LD and community trusts	Your Trust in 2016
Q21a	"Care of patients / service users is my organisation's top priority"	80%	72%	81%
Q21b	"My organisation acts on concerns raised by patients / service users"	81%	75%	81%
Q21c	"I would recommend my organisation as a place to work"	66%	58%	70%
Q21d	"If a friend or relative needed treatment, I would be happy with the standard of care provided by this organisation"	69%	67%	71%
KF1.	Staff recommendation of the organisation as a place to work or receive treatment (Q21a, 21c-d)	3.86	3.68	3.93

2. Overall indicator of staff engagement for East London NHS Foundation Trust

The figure below shows how East London NHS Foundation Trust compares with other combined mental health / learning disability and community trusts on an overall indicator of staff engagement. Possible scores range from 1 to 5, with 1 indicating that staff are poorly engaged (with their work, their team and their trust) and 5 indicating that staff are highly engaged. The trust's score of 3.90 was **above (better than) average** when compared with trusts of a similar type.

OVERALL STAFF ENGAGEMENT

(the higher the score the better)

This overall indicator of staff engagement has been calculated using the questions that make up Key Findings 1, 4 and 7. These Key Findings relate to the following aspects of staff engagement: staff members' perceived ability to contribute to improvements at work (Key Finding 7); their willingness to recommend the trust as a place to work or receive treatment (Key Finding 1); and the extent to which they feel motivated and engaged with their work (Key Finding 4).

The table below shows how East London NHS Foundation Trust compares with other combined mental health / learning disability and community trusts on each of the sub-dimensions of staff engagement, and whether there has been a significant change since the 2016 survey.

	Change since 2016 survey	Ranking, compared with all combined MH/LD and community trusts
OVERALL STAFF ENGAGEMENT	! Decrease (worse than 16)	✓ Above (better than) average
KF1. Staff recommendation of the trust as a place to work or receive treatment		
(the extent to which staff think care of patients/service users is the trust's top priority, would recommend their trust to others as a place to work, and would be happy with the standard of care provided by the trust if a friend or relative needed treatment.)	! Decrease (worse than 16)	✓ Above (better than) average
KF4. Staff motivation at work		
(the extent to which they look forward to going to work, and are enthusiastic about and absorbed in their jobs.)	• No change	✓ Above (better than) average
KF7. Staff ability to contribute towards improvements at work		
(the extent to which staff are able to make suggestions to improve the work of their team, have frequent opportunities to show initiative in their role, and are able to make improvements at work.)	• No change	✓ Above (better than) average

Full details of how the overall indicator of staff engagement was created can be found in the document ***Making sense of your staff survey data.***

3. Summary of 2017 Key Findings for East London NHS Foundation Trust

3.1 Top and Bottom Ranking Scores

This page highlights the five Key Findings for which East London NHS Foundation Trust compares most favourably with other combined mental health / learning disability and community trusts in England.

TOP FIVE RANKING SCORES

✓ KF13. Quality of non-mandatory training, learning or development

(the higher the score the better)

✓ KF2. Staff satisfaction with the quality of work and care they are able to deliver

(the higher the score the better)

✓ KF7. Percentage of staff able to contribute towards improvements at work

(the higher the score the better)

✓ KF6. Percentage of staff reporting good communication between senior management and staff

(the higher the score the better)

✓ KF29. Percentage of staff reporting errors, near misses or incidents witnessed in the last month

(the higher the score the better)

This page highlights the five Key Findings for which East London NHS Foundation Trust compares least favourably with other combined mental health / learning disability and community trusts in England. It is suggested that these areas might be seen as a starting point for local action to improve as an employer.

BOTTOM FIVE RANKING SCORES

! KF20. Percentage of staff experiencing discrimination at work in the last 12 months

(the lower the score the better)

! KF22. Percentage of staff experiencing physical violence from patients, relatives or the public in last 12 months

(the lower the score the better)

! KF21. Percentage of staff believing that the organisation provides equal opportunities for career progression or promotion

(the higher the score the better)

! KF26. Percentage of staff experiencing harassment, bullying or abuse from staff in last 12 months

(the lower the score the better)

! KF23. Percentage of staff experiencing physical violence from staff in last 12 months

(the lower the score the better)

For each of the 32 Key Findings, the combined mental health / learning disability and community trusts in England were placed in order from 1 (the top ranking score) to 29 (the bottom ranking score). East London NHS Foundation Trust's five lowest ranking scores are presented here, i.e. those for which the trust's Key Finding score is ranked closest to 29. Further details about this can be found in the document ***Making sense of your staff survey data.***

3.2 Largest Local Changes since the 2016 Survey

This page highlights the Key Finding that has improved at East London NHS Foundation Trust since the 2016 survey.

WHERE STAFF EXPERIENCE HAS IMPROVED

✓ **KF16. Percentage of staff working extra hours**

(the lower the score the better)

Because the Key Findings vary considerably in terms of subject matter and format (e.g. some are percentage scores, others are scale scores), a straightforward comparison of score changes is not the appropriate way to establish which Key Findings have improved the most. Rather, the extent of 2016-2017 change for each Key Finding has been measured in relation to the national variation for that Key Finding. Further details about this can be found in the document ***Making sense of your staff survey data.***

This page highlights the five Key Findings where staff experiences have deteriorated since the 2016 survey. It is suggested that these areas might be seen as a starting point for local action to improve as an employer. (However, please note that, as shown in section 3.3, when compared with other combined mental health / learning disability and community trusts in England, the scores for Key findings KF3, KF14, and KF31 are better than average).

WHERE STAFF EXPERIENCE HAS DETERIORATED

! KF3. Percentage of staff agreeing that their role makes a difference to patients / service users

(the higher the score the better)

! KF17. Percentage of staff feeling unwell due to work related stress in the last 12 months

(the lower the score the better)

! KF14. Staff satisfaction with resourcing and support

(the higher the score the better)

! KF31. Staff confidence and security in reporting unsafe clinical practice

(the higher the score the better)

! KF2. Staff satisfaction with the quality of work and care they are able to deliver

(the higher the score the better)

Because the Key Findings vary considerably in terms of subject matter and format (e.g. some are percentage scores, others are scale scores), a straightforward comparison of score changes is not the appropriate way to establish which Key Findings have deteriorated the most. Rather, the extent of 2016-2017 change for each Key Finding has been measured in relation to the national variation for that Key Finding. Further details about this can be found in the document ***Making sense of your staff survey data***.

3.3. Summary of all Key Findings for East London NHS Foundation Trust

KEY

Green = Positive finding, e.g. there has been a statistically significant positive change in the Key Finding since the 2016 survey.

Red = Negative finding, e.g. there has been a statistically significant negative change in the Key Finding since the 2016 survey.

Grey = No change, e.g. there has been no statistically significant change in this Key Finding since the 2016 survey.

For most of the Key Finding scores in this table, the higher the score the better. However, there are some scores for which a high score would represent a negative finding. For these scores, which are marked with an asterisk and in *italics*, the lower the score the better.

Change since 2016 survey

-15% -10% -5% 0% 5% 10% 15%

3.3. Summary of all Key Findings for East London NHS Foundation Trust

KEY

Green = Positive finding, e.g. there has been a statistically significant positive change in the Key Finding since the 2016 survey.

Red = Negative finding, e.g. there has been a statistically significant negative change in the Key Finding since the 2016 survey.

Grey = No change, e.g. there has been no statistically significant change in this Key Finding since the 2016 survey.

For most of the Key Finding scores in this table, the higher the score the better. However, there are some scores for which a high score would represent a negative finding. For these scores, which are marked with an asterisk and in *italics*, the lower the score the better.

Change since 2016 survey (cont)

3.3. Summary of all Key Findings for East London NHS Foundation Trust

KEY

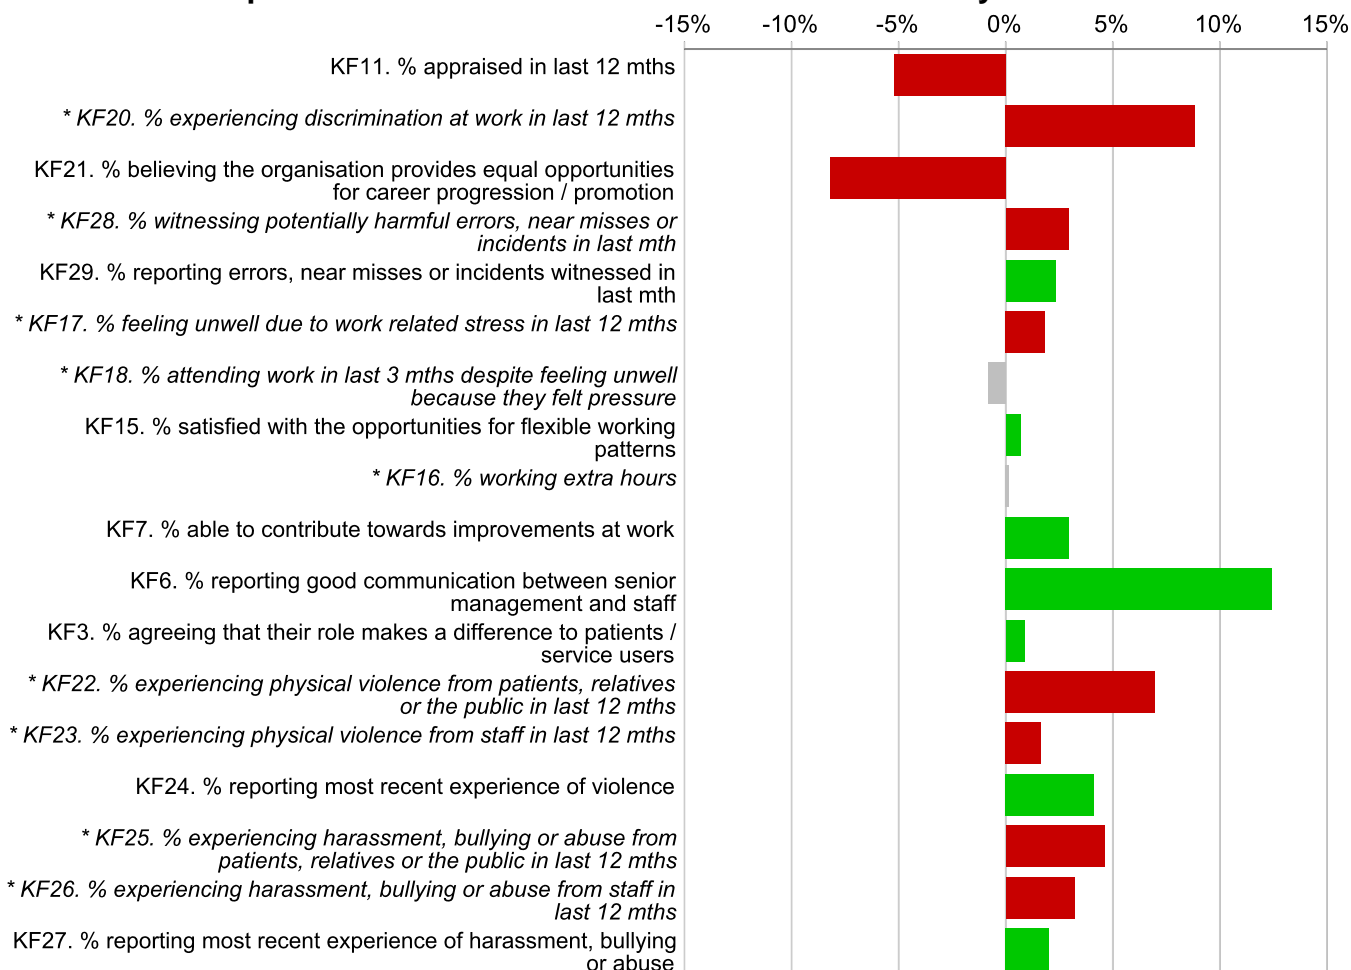

Green = Positive finding, e.g. better than average.

Red = Negative finding, i.e. worse than average.

Grey = Average.

For most of the Key Finding scores in this table, the higher the score the better. However, there are some scores for which a high score would represent a negative finding. For these scores, which are marked with an asterisk and in *italics*, the lower the score the better.

Comparison with all combined MH/LD and community trusts in 2017

3.3. Summary of all Key Findings for East London NHS Foundation Trust

KEY

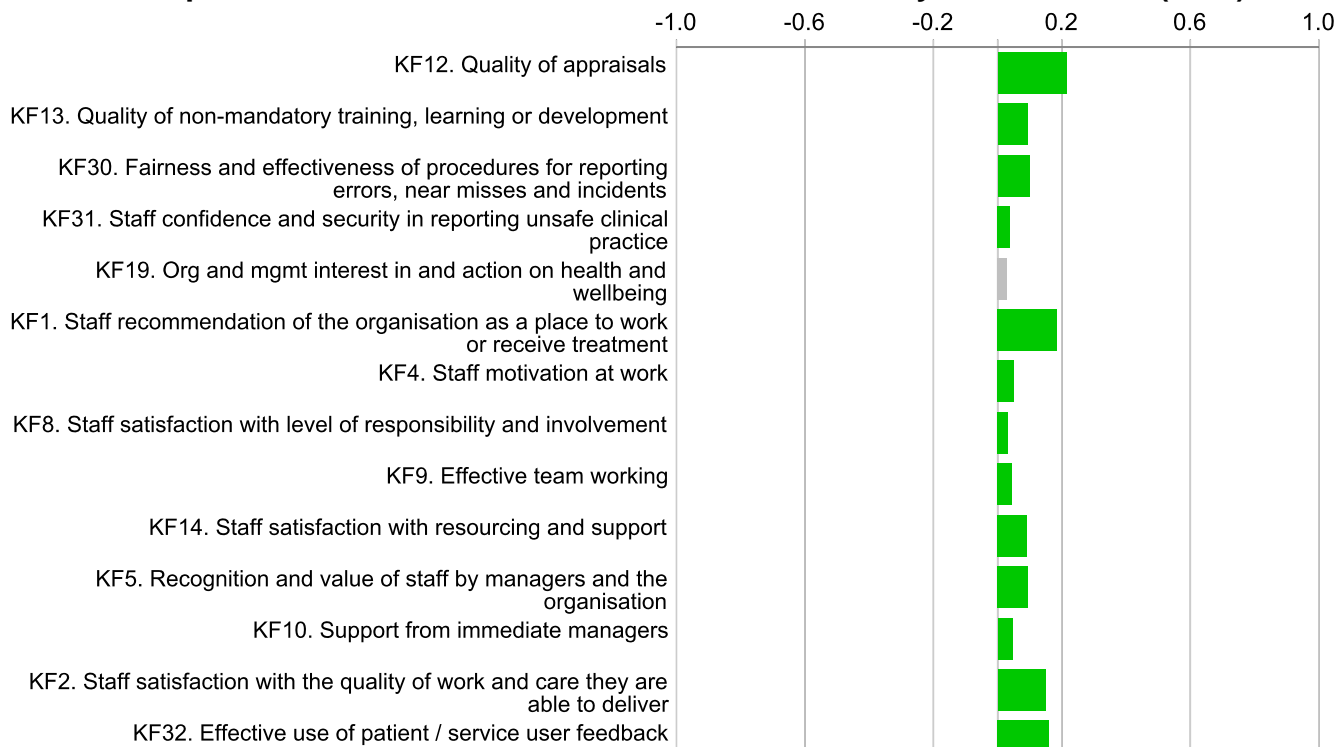

Green = Positive finding, e.g. better than average.

Red = Negative finding, i.e. worse than average.

Grey = Average.

For most of the Key Finding scores in this table, the higher the score the better. However, there are some scores for which a high score would represent a negative finding. For these scores, which are marked with an asterisk and in *italics*, the lower the score the better.

Comparison with all combined MH/LD and community trusts in 2017 (cont)

3.4. Summary of all Key Findings for East London NHS Foundation Trust

KEY

✓ Green = Positive finding, e.g. better than average, better than 2016.

! Red = Negative finding, e.g. worse than average, worse than 2016.

'Change since 2016 survey' indicates whether there has been a statistically significant change in the Key Finding since the 2016 survey.

-- No comparison to the 2016 data is possible.

* For most of the Key Finding scores in this table, the higher the score the better. However, there are some scores for which a high score would represent a negative finding. For these scores, which are marked with an asterisk and in *italics*, the lower the score the better.

	Change since 2016 survey	Ranking, compared with all combined MH/LD and community trusts in 2017
Appraisals & support for development		
KF11. % appraised in last 12 mths	• No change	! Below (worse than) average
KF12. Quality of appraisals	• No change	✓ Above (better than) average
KF13. Quality of non-mandatory training, learning or development	• No change	✓ Above (better than) average
Equality & diversity		
* <i>KF20. % experiencing discrimination at work in last 12 mths</i>	• No change	! Above (worse than) average
KF21. % believing the organisation provides equal opportunities for career progression / promotion	• No change	! Below (worse than) average
Errors & incidents		
* <i>KF28. % witnessing potentially harmful errors, near misses or incidents in last mth</i>	• No change	! Above (worse than) average
KF29. % reporting errors, near misses or incidents witnessed in last mth	• No change	✓ Above (better than) average
KF30. Fairness and effectiveness of procedures for reporting errors, near misses and incidents	• No change	✓ Above (better than) average
KF31. Staff confidence and security in reporting unsafe clinical practice	! Decrease (worse than 16)	✓ Above (better than) average
Health and wellbeing		
* <i>KF17. % feeling unwell due to work related stress in last 12 mths</i>	! Increase (worse than 16)	! Above (worse than) average
* <i>KF18. % attending work in last 3 mths despite feeling unwell because they felt pressure</i>	• No change	• Average
KF19. Org and mgmt interest in and action on health and wellbeing	• No change	• Average
Working patterns		
KF15. % satisfied with the opportunities for flexible working patterns	• No change	✓ Above (better than) average
* <i>KF16. % working extra hours</i>	✓ Decrease (better than 16)	• Average

3.4. Summary of all Key Findings for East London NHS Foundation Trust (cont)

	Change since 2016 survey	Ranking, compared with all combined MH/LD and community trusts in 2017
Job satisfaction		
KF1. Staff recommendation of the organisation as a place to work or receive treatment	! Decrease (worse than 16)	✓ Above (better than) average
KF4. Staff motivation at work	• No change	✓ Above (better than) average

KF8. Staff satisfaction with level of responsibility and involvement	• No change	✓ Above (better than) average
KF9. Effective team working	• No change	✓ Above (better than) average
KF14. Staff satisfaction with resourcing and support	! Decrease (worse than 16)	✓ Above (better than) average
Managers		
KF5. Recognition and value of staff by managers and the organisation	• No change	✓ Above (better than) average
KF6. % reporting good communication between senior management and staff	• No change	✓ Above (better than) average
KF10. Support from immediate managers	• No change	✓ Above (better than) average
Patient care & experience		
KF2. Staff satisfaction with the quality of work and care they are able to deliver	! Decrease (worse than 16)	✓ Above (better than) average
KF3. % agreeing that their role makes a difference to patients / service users	! Decrease (worse than 16)	✓ Above (better than) average
KF32. Effective use of patient / service user feedback	• No change	✓ Above (better than) average
Violence, harassment & bullying		
* KF22. % experiencing physical violence from patients, relatives or the public in last 12 mths	• No change	! Above (worse than) average
* KF23. % experiencing physical violence from staff in last 12 mths	• No change	! Above (worse than) average
KF24. % reporting most recent experience of violence	• No change	✓ Above (better than) average
* KF25. % experiencing harassment, bullying or abuse from patients, relatives or the public in last 12 mths	• No change	! Above (worse than) average
* KF26. % experiencing harassment, bullying or abuse from staff in last 12 mths	• No change	! Above (worse than) average
KF27. % reporting most recent experience of harassment, bullying or abuse	• No change	✓ Above (better than) average

4. Key Findings for East London NHS Foundation Trust

East London NHS Foundation Trust had 2384 staff take part in this survey. This is a response rate of 50%¹ which is above average for combined mental health / learning disability and community trusts in England (45%), and compares with a response rate of 45% in this trust in the 2016 survey.

This section presents each of the 32 Key Findings, using data from the trust's 2017 survey, and compares these to other combined mental health / learning disability and community trusts in England and to the trust's performance in the 2016 survey. The findings are arranged under nine themes: appraisals and support for development, equality and diversity, errors and incidents, health and wellbeing, working patterns, job satisfaction, managers, patient care and experience, and violence, harassment and bullying.

Positive findings are indicated with a **green arrow** (e.g. where the trust is better than average, or where the score has improved since 2016). **Negative findings** are highlighted with a **red arrow** (e.g. where the trust's score is worse than average, or where the score is not as good as 2016). An equals sign indicates that there has been no change.

Appraisals & support for development

KEY FINDING 11. Percentage of staff appraised in last 12 months

(the higher the score the better)

KEY FINDING 12. Quality of appraisals

(the higher the score the better)

¹Questionnaires were sent to all 4790 staff eligible to receive the survey. This includes only staff employed directly by the trust (i.e. excluding staff working for external contractors). It excludes bank staff unless they are also employed directly elsewhere in the trust. When calculating the response rate, questionnaires could only be counted if they were received with their ID number intact, by the closing date.

KEY FINDING 13. Quality of non-mandatory training, learning or development

(the higher the score the better)

Scale summary score

Equality & diversity

KEY FINDING 20. Percentage of staff experiencing discrimination at work in the last 12 months

(the lower the score the better)

Percentage score

KEY FINDING 21. Percentage of staff believing that the organisation provides equal opportunities for career progression or promotion

(the higher the score the better)

Percentage score

Errors & incidents

KEY FINDING 28. Percentage of staff witnessing potentially harmful errors, near misses or incidents in last month

(the lower the score the better)

Percentage score

KEY FINDING 29. Percentage of staff reporting errors, near misses or incidents witnessed in the last month

(the higher the score the better)

KEY FINDING 30. Fairness and effectiveness of procedures for reporting errors, near misses and incidents

(the higher the score the better)

KEY FINDING 31. Staff confidence and security in reporting unsafe clinical practice

(the higher the score the better)

Health and wellbeing

KEY FINDING 17. Percentage of staff feeling unwell due to work related stress in the last 12 months

(the lower the score the better)

KEY FINDING 18. Percentage of staff attending work in the last 3 months despite feeling unwell because they felt pressure from their manager, colleagues or themselves

(the lower the score the better)

KEY FINDING 19. Organisation and management interest in and action on health and wellbeing

(the higher the score the better)

Working patterns

KEY FINDING 15. Percentage of staff satisfied with the opportunities for flexible working patterns

(the higher the score the better)

KEY FINDING 16. Percentage of staff working extra hours

(the lower the score the better)

KEY FINDING 1. Staff recommendation of the organisation as a place to work or receive treatment

(the higher the score the better)

KEY FINDING 4. Staff motivation at work

(the higher the score the better)

KEY FINDING 7. Percentage of staff able to contribute towards improvements at work

(the higher the score the better)

KEY FINDING 8. Staff satisfaction with level of responsibility and involvement

(the higher the score the better)

KEY FINDING 9. Effective team working

(the higher the score the better)

KEY FINDING 14. Staff satisfaction with resourcing and support

(the higher the score the better)

Managers

KEY FINDING 5. Recognition and value of staff by managers and the organisation

(the higher the score the better)

KEY FINDING 6. Percentage of staff reporting good communication between senior management and staff

(the higher the score the better)

KEY FINDING 10. Support from immediate managers

(the higher the score the better)

Patient care & experience

KEY FINDING 2. Staff satisfaction with the quality of work and care they are able to deliver

(the higher the score the better)

KEY FINDING 3. Percentage of staff agreeing that their role makes a difference to patients / service users

(the higher the score the better)

KEY FINDING 32. Effective use of patient / service user feedback

(the higher the score the better)

Violence, harassment & bullying

KEY FINDING 22. Percentage of staff experiencing physical violence from patients, relatives or the public in last 12 months

(the lower the score the better)

KEY FINDING 23. Percentage of staff experiencing physical violence from staff in last 12 months

(the lower the score the better)

KEY FINDING 24. Percentage of staff / colleagues reporting most recent experience of violence

(the higher the score the better)

KEY FINDING 25. Percentage of staff experiencing harassment, bullying or abuse from patients, relatives or the public in last 12 months

(the lower the score the better)

KEY FINDING 26. Percentage of staff experiencing harassment, bullying or abuse from staff in last 12 months

(the lower the score the better)

KEY FINDING 27. Percentage of staff / colleagues reporting most recent experience of harassment, bullying or abuse

(the higher the score the better)

5. Workforce Race Equality Standard (WRES)

The scores presented below are the un-weighted question level score for question Q17b and un-weighted scores for Key Findings 25, 26, and 21, split between White and Black and Minority Ethnic (BME) staff, as required for the Workforce Race Equality Standard.

In order to preserve the anonymity of individual staff, a score is replaced with a dash if the staff group in question contributed fewer than 11 responses to that score.

			Your Trust in 2017	Average (median) for combined MH/LD and community trusts	Your Trust in 2016
KF25	Percentage of staff experiencing harassment, bullying or abuse from patients, relatives or the public in last 12 months	White	29%	25%	30%
		BME	33%	28%	36%
KF26	Percentage of staff experiencing harassment, bullying or abuse from staff in last 12 months	White	23%	20%	21%
		BME	23%	23%	25%
KF21	Percentage of staff believing that the organisation provides equal opportunities for career progression or promotion	White	84%	88%	86%
		BME	73%	76%	70%
Q17b	In the 12 last months have you personally experienced discrimination at work from manager/team leader or other colleagues?	White	9%	6%	8%
		BME	13%	11%	14%

6. Key Findings by work group characteristics

Tables 6.1 to 6.4 show the Key Findings at East London NHS Foundation Trust broken down by work group characteristics: occupational groups, locations, and full time/part time staff.

Technical notes:

- As in previous years, there are two types of Key Finding:
 - percentage scores, i.e. percentage of staff giving a particular response to one, or a series of, survey questions
 - scale summary scores, calculated by converting staff responses to particular questions into scores. For each of these scale summary scores, the minimum score is always 1 and the maximum score is 5
- For most of the Key Findings presented in tables 6.1 to 6.4, the higher the score the better. However, there are some Key Findings for which a high score would represent a negative result. For these Key Findings, marked with an asterisk and shown in italics, the lower the score the better.
- Care should be taken not to over interpret the findings if scores differ slightly. For example, if for 'KF11. % appraised in the last 12 months' staff in Group A score 45%, and staff in Group B score 40%, it may appear that a higher proportion of staff in Group A have had appraisals than staff in Group B. However, because of small numbers in these sub-groups, it is probably not statistically significant. A more sensible interpretation would be that, on average, similar proportions of staff in Group A and B have had appraisals.
- Please note that, unlike the overall trust scores, data in this section are not weighted.
- Please also note that all percentage scores are shown to the nearest 1%. This means scores of less than 0.5% are displayed as 0%.
- In order to preserve anonymity of individual staff, a score is replaced with a dash if the staff group in question contributed fewer than 11 responses to that score.

7. Key Findings by demographic groups

Tables 7.1 and 7.2 show the Key Findings at East London NHS Foundation Trust broken down by different demographic groups: age group, gender, disability and ethnic background.

Technical notes:

- As in previous years, there are two types of Key Finding:
 - percentage scores, i.e. percentage of staff giving a particular response to one, or a series of, survey questions
 - scale summary scores, calculated by converting staff responses to particular questions into scores. For each of these scale summary scores, the minimum score is always 1 and the maximum score is 5
- For most of the Key Findings presented in tables 7.1 and 7.2, the higher the score the better. However, there are some Key Findings for which a high score would represent a negative result. For these Key Findings, marked with an asterisk and shown in italics, the lower the score the better.
- Care should be taken not to over interpret the findings if scores differ slightly. For example, if for 'KF11. % appraised in the last 12 months' staff in Group A score 45%, and staff in Group B score 40%, it may appear that a higher proportion of staff in Group A have had appraisals than staff in Group B. However, because of small numbers in these sub-groups, it is probably not statistically significant. A more sensible interpretation would be that, on average, similar proportions of staff in Group A and B have had appraisals.
- Please note that, unlike the overall trust scores, data in this section are not weighted.
- Please also note that all percentage scores are shown to the nearest 1%. This means scores of less than 0.5% are displayed as 0%.
- In order to preserve anonymity of individual staff, a score is replaced with a dash if the demographic group in question contributed fewer than 11 responses to that score.

Table 7.1: Key Findings for different age groups

8. Work and demographic profile of the survey respondents

The occupational group of the staff survey respondents is shown in table 8.1, other work characteristics are shown in table 8.2, and demographic characteristics are shown in table 8.3.

Table 8.1: Occupational group of respondents

Occupational group	Number questionnaires returned	Percentage of survey respondents
Allied Health Professionals		
Occupational Therapy	120	6%
Physiotherapy	29	1%
Clinical Psychology	133	6%
Psychotherapy	95	4%
Arts Therapy	23	1%
Other qualified Allied Health Professionals	88	4%
Support to Allied Health Professionals	119	6%
Scientific and Technical / Healthcare Scientists		
Pharmacy	33	2%
Other qualified Scientific and Technical / Healthcare Scientists	1	0%
Support to Scientific and Technical / Healthcare Scientists	8	0%
Medical and Dental		
Medical / Dental - Consultant	98	5%
Medical / Dental - In Training	34	2%
Medical / Dental - Other	21	1%
Operational ambulance staff		
Ambulance control staff	1	0%
Patient Transport Service	1	0%
Nurses, Midwives and Nursing Assistants		
Registered Nurses - Adult / General	58	3%
Registered Nurses - Mental Health	460	22%
Registered Nurses - Learning Disabilities	36	2%
Registered Nurses - Children	7	0%
Health Visitors	3	0%
Registered Nurses - District / Community	44	2%
Other Registered Nurses	14	1%
Nursing auxiliary / Nursing assistant / Healthcare assistant	125	6%
Social Care Staff		
Approved social workers / Social workers / Residential social workers	41	2%
Social care managers	7	0%
Social care support staff	23	1%

Occupational group	Number questionnaires returned	Percentage of survey respondents
<i>Other groups</i>		
Public Health / Health Improvement	13	1%
Admin and Clerical	278	13%
Central Functions / Corporate Services	89	4%
Maintenance / Ancillary	13	1%
General Management	67	3%
Other	57	3%
Did not specify	245	

Table 8.2: Work characteristics of respondents

	Number questionnaires returned	Percentage of survey respondents
<i>Full time / part time</i>		
Full time	1985	86%
Part time	314	14%
Did not specify	85	
<i>Length of time in organisation</i>		
Less than a year	269	13%
Between 1 to 2 years	440	21%
Between 3 to 5 years	367	18%
Between 6 to 10 years	388	19%
Between 11 to 15 years	280	13%
Over 15 years	348	17%
Did not specify	292	

Sums of percentages may add up to more than 100% due to rounding, and do not include 'did not specify' responses

Table 8.3: Demographic characteristics of respondents

	Number questionnaires returned	Percentage of survey respondents
<i>Age group</i>		
Between 16 and 30	362	16%
Between 31 and 40	585	26%
Between 41 and 50	609	27%
51 and over	670	30%
Did not specify	158	
<i>Gender</i>		
Male	581	26%
Female	1550	70%
Prefer not to say	81	4%
Did not specify	172	
<i>Ethnic background</i>		
White	1271	57%
Black and minority ethnic	955	43%
Did not specify	158	
<i>Disability</i>		
Disabled	405	18%
Not disabled	1826	82%
Did not specify	153	

Sums of percentages may add up to more than 100% due to rounding, and do not include 'did not specify' responses

Appendix 1

Key Findings for East London NHS Foundation Trust benchmarked against other combined mental health / learning disability and community trusts

Technical notes:

- The first column in table A1 shows the trust's scores for each of the Key Findings. The same data are displayed in section 3 and 4 of this report.
- The second column in table A1 shows the 95% confidence intervals around the trust's scores for each of the Key Findings.
- The third column in table A1 shows the average (median) score for each of the Key Findings for combined mental health / learning disability and community trusts. The same data are displayed in section 3 and 4 of this report.
- The fourth and fifth columns in table A1 show the thresholds for below and above average scores for each of the Key Findings for combined mental health / learning disability and community trusts. The data are used to describe comparisons with other trusts as displayed in section 3 and 4 of this report.
- The sixth column in table A1 shows the lowest score attained for each of the Key Findings by an combined mental health / learning disability and community trust.
- The seventh column in table A1 shows the highest score attained for each of the Key Findings by an combined mental health / learning disability and community trust.
- For most of the Key Findings presented in table A1, the higher the score the better. However, there are some Key Findings for which a high score would represent a negative score. For these Key Findings, marked with an asterisk and shown in italics, the lower the score the better.
- Please note that the data presented in table A1 are rounded to the nearest whole number for percentage scores and to two decimal places for scale summary scores.

Table A1: Key Findings for East London NHS Foundation Trust benchmarked against other combined mental health / learning disability and community trusts

	Your trust		National scores for combined MH/LD and community trusts

Appendix 2

Changes to the Key Findings since the 2015 and 2016 staff surveys

Technical notes:

- For most of the Key Findings presented in tables A2.1 and A2.2, the higher the score the better. However, there are some Key Findings for which a high score would represent a negative result. For these Key Findings, marked with an asterisk and shown in italics, the lower the score the better.
- It is likely that we would see some small change simply due to sample differences between the two years. The final column of the tables shows whether the change in your trust is statistically significant or not. If a change is not significant, then there is no evidence of a real change in the trust score.
- Please note that the trust scores and change scores presented in tables A2.1 and A2.2 are rounded to the nearest whole number for percentage scores and to two decimal places for scale summary scores.
- All percentage scores are shown to the nearest 1%. This means scores of less than 0.5% are displayed as 0%.
- In certain cases a dash (-) appears in Table A2.2. This is either because the Key Finding was not calculated in previous years, or there have been changes in how the Key Finding has been calculated this year.

To enable comparison between years, scores from 2016 and 2015 have been re-calculated and re-weighted using the 2017 formulae, so may appear slightly different from figures in previous feedback reports. More details about these changes can be found in the document ***Making sense of your staff survey data***, which can be downloaded from www.nhsstaffsurveys.com.

Table A2.1: Changes in the Key Findings for East London NHS Foundation Trust since 2016 survey

	East London NHS Foundation Trust			
	2017 score	2016 score	Change	Statistically significant?
Response rate	50	45	5	N/A

Appendix 3

Data tables: 2017 Key Findings and the responses to all survey questions

For each of the 32 Key Findings (Table A3.1) and each individual survey question in the core version of the questionnaire (Table A3.2), this appendix presents your trust's 2017 survey response, the average (median) 2017 response for combined mental health / learning disability and community trusts, and your trust's 2016 survey response (where applicable).

In Table A3.1, the question numbers used to calculate the 32 Key Findings are also listed in the first column.

In Table A3.2, the responses to the survey questions are presented in the order that they appear within the core version of the 2017 questionnaire.

Technical notes:

- In certain cases a dash (-) appears in Tables A3.1 or A3.2. This is in order to preserve anonymity of individual staff, where there were fewer than 11 responses to a survey question or Key Finding.
- Please note that the figures reported in tables A3.1 and A3.2 are un-weighted, and, as a consequence there may be some slight differences between these figures and the figures reported in sections 3 and 4 and Appendix 2 of this report, which are weighted according to the occupational group profile of a typical combined mental health / learning disability and community trust.
- The question data within this section excludes any non-specific responses ('Don't know'/'Can't remember').
- More details about the calculation of Key Findings and the weighting of data can be found in the document ***Making sense of your staff survey data***, which can be downloaded from: www.nhsstaffsurveys.com

Table A3.1: Key Findings for East London NHS Foundation Trust benchmarked against other combined mental health / learning disability and community trusts

Appendix 4

Other NHS staff survey 2017 documentation

This report is one of several ways in which we present the results of the 2017 national NHS staff survey:

- 1) A separate summary report of the main 2017 survey results for East London NHS Foundation Trust can be downloaded from: www.nhsstaffsurveys.com. The summary report is a shorter version of this feedback report, which may be useful for wider circulation within the trust.
- 2) A national briefing document, describing the national Key Findings from the 2017 survey and making comparisons with previous years, will be available from www.nhsstaffsurveys.com in March 2018.
- 3) The document ***Making sense of your staff survey data***, which can be downloaded from www.nhsstaffsurveys.com. This includes details about the calculation of Key Findings and the data weighting method used.
- 4) A series of detailed spreadsheets will be made available after publication via www.nhsstaffsurveys.com. In these detailed spreadsheets you will be able to find:
 - responses of staff in your trust to every core survey question
 - responses in every trust in England
 - the average responses for each major trust type (e.g. all acute trusts, all ambulance trusts)
 - the average responses for each major occupational and demographic group within the major trust types
