One year on, since our last Public Engagement event for Luton Community Mental Health Transformation. For Adults and Older Adults.

You said and we took the initial steps towards implementing those changes but we still have more to do hence we invite you to come along to hear about what has taken place during the 1st year.

We would like to you continue to participate in steering the direction of our Community Mental Health services.

Do you still have an interest and wish to hear what has taken place over the last year, since our last public Engagement Event in Luton? Do you still wish to be involved?

Are you a person with lived experience, a carer, charity, health and social care professional, other stakeholder?

Please register on Eventbrite or speak to your support worker if you are receiving a health service in Luton.
