

# Oxehealth Patient Information

## What is Oxehealth?

This is a Life Signs Monitoring System installed in all ELFT seclusion rooms. Optical sensors will allow staff to remotely monitor your safety and wellbeing whilst you are in seclusion.

Staff will also continue constant visual observations at all times whilst you are in seclusion.

## What does the Oxehealth system do?

The Oxehealth system:

- Supports with monitoring signs of life- the system takes spot-check pulse and breathing rate observations without disturbing you.

## Have concerns or want to know more?

Please speak to a member of the nursing team.
